

As an Over The Road commercial truck driver, satellite radio is a life saver. With uninterrupted reception, live 24/7 news and weather, specific channels for truckers, satellite radio brings instant information to those of us on the road. It helps prevent us from entering weather problems, thus causing even more unsafe situations. It allows us to protect ourselves from becoming involved in situations we could have prevented had we known. And it provides us the utmost in entertainment in some of the most remote parts of this country. Limiting satellite radio would be a detrement to drivers, both commercial and public, all over the US. satellite radio is by far better than most commercial raio stations and must be allowed to continue.
